

## **FreePrints Mobile App Gives iOS, Android and Windows Phone Users up to 1,000 Free 4x6 Photo Prints per Year**

*Also available for Windows 8 desktops, notebooks and tablets*

**CALABASAS, Calif., Sept. 4, 2013** — FreePrints by PhotoAffections mobile app (<http://www.FreePrintsApp.com>) gives iOS, Android, Windows Phone and Windows 8 users up to 1,000 free 4x6-inch photo prints per year (up to 85 unique prints per month). With just a few taps, users can choose photos from mobile galleries or from social media sites and then order their free photo prints directly from their mobile devices. FreePrints is the *only* free photo print mobile app service available.

“Whether it’s a holiday, a birthday party, or just a photo-perfect moment, users of FreePrints by PhotoAffections can easily select and order prints right from their mobile phones or social media sites — even while they are still at the event,” said Adam Black, product development manager of PhotoAffections. “With FreePrints, users don’t waste time uploading photos to their home computers, fighting with a photo kiosk, or trekking to the drug store to pick up prints. A simple tap to select and order the prints is all it takes using the FreePrints app.”

FreePrints is available for virtually every smartphone, including iOS, Android and Windows Phone. In addition, the FreePrints app is now available for Windows 8 desktop, notebook and tablet users. Users can crop and resize photos right in the app, making it fast and easy to get the perfect print. Then just tap to select any picture from the mobile phone gallery — as well as from Facebook, Instagram, Flickr or Picasa — to order and receive free professionally printed 4x6 photos delivered right to the doorstep in just a few days.

Users can also order other print sizes — from 5x5 to 20x30 — all printed on deluxe glossy or premium matte paper for very competitive prices. Users just pay a minimal shipping and handling fee, starting as low as \$1.99 and never more than \$9.99, no matter how many prints are ordered.

All uploaded photos are also automatically saved to PhotoAffections ([www.PhotoAffections.com](http://www.PhotoAffections.com)), a leading online provider of [photo birth announcements](#), [invitations](#), [photo cards](#), [wall décor](#) and more. Having the photos automatically saved to PhotoAffections.com makes it easy for users to order photo cards or gifts, including [custom photo smartphone cases](#) and [canvas prints](#), without having to upload the photos again.

To try FreePrints, download the free mobile app from the App Store, Google Play, Windows Phone Store or Windows Store (or directly from [www.FreePrintsApp.com](http://www.FreePrintsApp.com)) and immediately begin ordering free prints.

### **About PhotoAffections.com**

Founded in 1997 as a professional photo lab, PhotoAffections.com went online in 2004, became exclusive e-commerce in 2007, and has grown steadily ever since into a top-rated destination for photo cards and wall art. PhotoAffections is proud to deliver creative and unique designer birth announcements, holiday photo cards, party invitations, wedding announcements and more, as well as canvas prints and other wall décor products. At PhotoAffections, we take great pride in printing every one of our photo cards at costs that allow us to pass onto our customers not only great savings but the highest possible quality as well.
